Subject: Work at home tasks completed 9/12/2018

Hello Barbara,

Here is a list of work at home tasks completed on 9/12/2018 (6.5 hrs work and 1.5 hr time-off):

- Issued conditional approval for Wilmington Marine Services to Mark Withrow with the Port of LA.
- Discussion with Karen Irwin regarding the LARWQCB's Contaminated Sediments Management Plan, and their long-term management strategy for managing sediments at the POLA. Also discussed the regulatory/voluntary aspect of the cleanup, timeframes, and specific areas in the marine shoreline that will be addressed. Also, use of this site as the pilot for ECOSpears technology for removing PCBs in shallow-water sediments, as this site, which would be an ideal case for demonstrating this technology to EPA HQ.
- Received and began reviewing the modified Cleanup Plan from ARE and Ramboll for 825/835 Industrial Rd.
- Sent Mitch Kaplan examples of approvals and offered to assist him with preparing his approval using the format that Steve Armann described in an email Steve sent me today.

Thanks,
Cynthia
